

2 Setting the scene

Clearly define the range of view that the priority setting process will cover.

Key actions

- Scope of priority setting – decide on focus (i.e. diseases, health system, health research system), timeframe, periodicity, and extent (national, sub national, institutional) of priority setting
- Define ethical standards to which the process should comply Engage partners – formalise the partnerships arrangement and define responsibilities

Tools

Defining the scope	Futures toolkit – deciding the scope ppt
Defining ethical standards	Accountability for reasonableness pdf
Engaging partners	Template of agreement
