

COHRED Annual Review2001

The 2001 COHRED Annual Review is the first review published after the International Conference on Health Research for Development (Bangkok, 2000). The report gives readers an impression of how the new COHRED is being shaped and provides a taste of activities which took place in 2001. It will give readers a sense of what COHRED stands for and illustrates how COHRED intends to provide a platform for key actors to debate on health research management issues relevant to countries.
